

Form builder in CMS

by Mike Hall, Software Engineer January 25 2016 10:22 AM

Here is a quick tutorial on how to use the section.

- 1. Log into the CMS.
- 2. Click on 'Forms'. This page is set up similar to pages, the first screen is the creation screen, and the built forms are below.

		Lagged in as: wilke Editing Testing Site \$20.00 File Browser Bellinza Utilites Users Held food
Home Menu Header Pages Forms Side	Fooler Events Email Marketing Gallery Blog Pt	lugins RSS Plugin
FORMS Create New Form Form Name: Email To: Email CC: Email BCC: Email BCC:	Create new form	
	Drag a field from the right to this area	Form Elements Autocomplete Date Field Checkbox Ti Checkbox Group
		III Radio Group III Rich Text Editor III Select t⇒ Text Field
Create Form Created Forms	Existing forms	
My Testing Form		

- 3. To create a new form you need to give it name. Keep in mind the name of the form will come over to the client as part of the subject line.
- 4. Enter the email address where the form is to be submitted. CC and BCC options are available. If you would like to CC more than one email address, the format is like this: someone@gmail.com; <a href="mailto:

5. Next drag and drop the 'form elements' on to the stage. Form this example I will we using the 'text field'.

FORMS					
Editing Form - My Testing Form Form Name: My Testing Form					
Email To: mhali@riverbender.com					
Email CC.	2. Click the edit button				
Email BCC:		Form Elemen	sta		
166 160		Autocor	mplete		
		🗂 Date Fil	eld		
		🖻 Checkb	IOK.		
		T Checkb	lox Group		
	1000000	🗐 Radio G	liroup		
	- Drag onto	Rich Te	st Editor		
		E Select ⇔ Text Fit	ed		
Save Done Editing					

6. Click on the edit button to change the label and name of the form element. In this example the Label will be First name, I will also change the default 'name' to first-name. The form name is name of the variable that is sent from the users machine to the server. Each name in a form has to be unique and must not contain any spaces. The form generator will force '-' in place of spaces for you automatically. *Keep in mind that the 'name' value will so the identifier sent to the email address defined once submitted. After changes have been made, you much click the edit button to save the changes. You may then click on the 'save' button to save the form.
