

Metro area job data mixed, unemployment rates increase in all metro areas

April 22 2016 9:31 AM

CHICAGO—All metropolitan areas in Illinois experienced over the year unemployment rate increases for the second consecutive month, according to preliminary data released today by the U.S. Bureau of Labor Statistics (BLS) and the Illinois Department of Employment Security (IDES).

“Unemployment rates increased in more than half of the metro areas even though they experienced job growth,” said IDES Director Jeff Mays. “The increase in the unemployment rate was largely due to more people entering the labor force”

Illinois businesses added jobs in just eight metros, in which the largest increases were seen in: Lake-Kenosha (+2.5 percent, +9,900), Rockford (+2.4 percent, +3,600), and Elgin (+2.3, +5,600). Total nonfarm jobs in the Chicago-Naperville-Arlington Heights Metro Division increased (+1.8 percent or +65,500). Illinois businesses lost jobs in six metro areas including Bloomington (-2.3 percent, -2,200), Danville (-0.7 percent, -200), and the Quad Cities (-0.7 percent, -1,200). The industry sectors recording job growth in the majority of metros were: Education and Health Services (13 of 14), Leisure and Hospitality (11 of 14), Retail (10 of 14), Government (10 of 14), Mining and Construction (nine of 14), Transportation, Warehousing, and Utilities (nine of 14), Professional and Business Services (nine of 14), and Other Services (eight of 14).

Not seasonally adjusted data compares March 2016 with March 2015. The not seasonally adjusted Illinois rate was 6.8 percent in March 2016 and stood at 12.2 percent at its peak in this economic cycle in January 2010. Nationally, the not seasonally adjusted unemployment rate was 5.1 percent in March 2016 and 10.6 percent in January 2010 at its peak. The unemployment rate identifies those who are out of work and looking for work, and is not tied to collecting unemployment insurance benefits.
