

Renewable Energy is on the Rise in Metroeast

February 28 2020 11:14 AM

Come to the Sierra Club's monthly Speakers' Series on March 9, 2020, at the Old Bakery Beer Co. for a special presentation by Kevin McKee, a respected volunteer renewable energy advocate ("Solar Ambassador") with the Illinois Solar Energy Association and with the Midwest Renewable Energy Association. On behalf of these non-profit organizations, McKee educates the public about renewable energy, with a focus on solar energy. He also advocates for renewable energy and electric transportation policies with the Illinois state legislature and with local municipal governments. McKee will explain the status of renewable energy in Illinois and the Metro East, highlighting exciting progress, what's on the horizon, and what's needed to maintain that progress. He'll briefly discuss programs that truly make solar power available and affordable for most Metro East energy consumers, and what they can do to transition toward a cleaner, greener energy future. Kevin is retired from a successful career with the National Geospatial-Intelligence Agency and is an active Sierra Club Member.

Attendees and friends are invited to have dinner and meet the speaker at [The Old Bakery Beer Company](#), 400 Landmarks Blvd., Alton, IL 62002 on Monday, March 9, 2020, at 6:30 PM. The program will begin at 7:30 PM in the Event Room adjacent to the dining room. If you have any questions, call or text Chris Krusa at 410-490-5024.
