

L&C Introduces Full Month of Virtual Open House Events

September 30 2020 9:46 AM

GODFREY – Lewis and Clark Community College invites prospective students of all ages to join one of a series of upcoming virtual recruitment events to learn more about becoming a Trailblazer.

Discover Nights will be held from 6-7 p.m. every Monday and Thursday evening throughout October on Zoom, and will give participants the opportunity to hear from enrollment and financial aid reps, enjoy a virtual tour, and the chance to win cool L&C swag just for attending.

Each event will include general admissions information, featuring breakout sessions with program coordinators for those interested in learning more about some of the degree and certificate programs offered at the college.

“We’ve moved our traditional open house event online and into the evening so we could avoid large crowds on campus and simultaneously provide more opportunities for students at every point in their academic or career journey to join us,” said Director of Enrollment and Advising Delfina Dornes. “We hope anyone considering college will attend and see what Lewis and Clark is all about.”

Discover Nights are a play on the college’s usual Discover Day open house, which typically takes place on Columbus Day and President’s Day each year, but cannot be held in person this year due to the COVID-19 pandemic.

Students can register for any of these free events at www.lc.edu/discoverdays. Zoom login details will be sent to registrants prior to their event start.

Upcoming Events

October 5, 6 - 7 p.m.
