November 20 2020 1:25 PM

**SPRINGFIELD** – The coronavirus outbreak continued to hit Madison County and Greene County hard. In the past 24 hours in Madison County, there were six COVID-19-related deaths. The list of deaths in Madison County included: 1 female 70s, 1 male 70s, 1 female 80s, 2 females 90s, 1 male 90s

In Greene County in the past 24 hours, there were three new COVID-19-related deaths announced. The Greene County COVID-19-related deaths included: 1 female 60s, 1 male 80s, 1 male 90s.

The Illinois Department of Public Health (IDPH) today reported 14,612 new confirmed and probable cases of coronavirus disease (COVID-19) in Illinois, including 168 additional deaths.

Madison County Public Health Director Toni Corona said there has been a tremendous upswing in new cases in Madison County in recent days. On Wednesday, Nov. 19, there were 346 confirmed new cases of COVID-19 in Madison County.

"We are seeing the same trend in Madison County we are seeing throughout the Midwest," she said. "We need to be more concerned that we don't want to do anything to compromise our local hospitals. The best message I can deliver is stay at home if you can. If have to go out, wear a mask to hopefully decrease the surge in cases. It is important to do just essential things with the holidays and Thanksgiving coming. The public has been asked to avoid large gatherings. The truth of the matter is these are the best tools we have is to stay inside our own households during the holidays. When we look at new cases and the positivity rate were are almost 7 times the ideal threshold. We are seeing an exponential growth in cases."

It is incredibly hard but people want us to rationalize the severity of this illness all do seeing sigigicniant increases in cases

Positivity rate look at new cases 7 x almost what ideal threshold mad. County as well as orange

New cases last fri 416 per 100000 looking at that metric last June

We are seeing an exponentiion stay at home if can wear a mask if have to go out if just slow down the movement of people would be h kind of what

Really encouraging people to be safe in middle of pandemic we are all tired just hope people are jus safe and smart really not saying stay home made incredible not a good time right now

During a time like this when so many experience social isolation the need for nutrition is even greater. This is where we come together as a community and help each other.
