Currently, IDPH is reporting a total of 1,346,398 cases, including 22,096 deaths, in 102 counties in Illinois. The age of cases ranges from younger than one to older than 100 years. Within the past 24 hours, laboratories have reported 77,670 specimens for a total of 23,007,188. As of last night, 2,060 individuals in Illinois were reported to be in the hospital with COVID-19. Of those, 496 patients were in the ICU and 249 patients with COVID-19 were on ventilators.

The preliminary seven-day statewide positivity for cases as a percent of total test from April 28-May 4, 2021 is 3.3%. The preliminary seven-day statewide test positivity from April 28-May 4, 2021 is 3.9%.

As President Biden sets the goal of vaccinating 70% of adults by July 4, 2021, Illinois has administered more doses than the national average and will continue to pursue innovative strategies to encourage all eligible residents to get vaccinated.

A total of 9,546,833 vaccines have been administered in Illinois as of last midnight. The seven-day rolling average of vaccines administered daily is 71,219 doses. Yesterday, 96,415 doses were reported administered in Illinois, including approximately 40,000 doses that were not reported by pharmacies over the weekend because of a national system issue. Additional doses could also be added.

*All data are provisional and will change. In order to rapidly report COVID-19 information to the public, data are being reported in real-time. Information is constantly being entered into an electronic system and the number of cases and deaths can change as additional information is gathered.
