

# **Illinois American Water's Work To Separate The Alton Combined Sewer System And Install New Sanitary Sewers Continues**

November 19 2021 2:39 PM

Below is information about this week's road closures – Nov. 22, 2021

Piasa Valley Area:

6th Street from Market Street east to Easton Street is closed, with future work heading east to Alton Street. Alby Street is closed from 7th Street south toward 4th Street. 5th Street is closed from Alby Street east to Court Street, with the future closing of Court Street coming in several weeks.

Turner Tract Area:

Lincoln Street will continue to be closed from McKinley St. south to the alley. Work is ongoing west of Lincoln Street on McKinley Blvd. The west end of the alley west of Lincoln Street, between McPherson and Douglas Streets is closed to traffic. Work is expected to progress north of McKinley Street on Lincoln Street after the Thanksgiving holiday.

Shields Valley Area:

Chamberlin Street is closed north of Bozza Street to Greenwood Street. The west end of Greenwood Street is closed. Pavement restoration work on Chamberlin Street between Walker and Bozza is expected to start after the Thanksgiving holiday. The intersection of Walker/Chamberlin Streets will continue to be closed.

## Background:

Over six miles of sanitary sewer main is being installed in the Turner Tract, Shields Valley and Piasa Valley areas of Alton. Work kicked off in February 2021 and will continue to progress until 2023. When Illinois American Water acquired the Alton Regional Wastewater system the company made a commitment to address requirements set forth by the Illinois Environmental Protection Agency to remedy combined sewer overflows.

- The projects in Turner Tract and Shields Valley will address 1.69 miles of sanitary sewer main.
  - These projects will continue into early 2022, depending on the location.
  - Project area will change based on progress of work. Signs will be placed ahead of construction work to notify customers of upcoming closures.
- The work in Piasa Valley began this spring.
  - This project includes almost five miles of sanitary sewer main.
  - Work is expected to continue for over two years.
    - This does not mean work will occur in one area for 24 months, but rather, projects will continue to progress throughout neighborhoods during that

time period. Signs will be placed ahead of construction to notify customers of upcoming closures.

### Safety:

These closures are necessary for investments to the wastewater system to be completed in a safe manner. At Illinois American Water our team and our contractors work as quickly as possible to minimize inconvenience to our customers. We do our best to minimize the length of construction, but our #1 priority is safety. At times, road and sidewalk closures may be extended to support our commitment to safety.

Contact: Customers should call 800-422-2782 with questions.
