

# Illinois American Water Project Update

December 2 2021 2:55 PM

ILLINOIS  
AMERICAN WATER

Illinois American Water's work to separate the Alton combined sewer system and install new sanitary sewers continues.

Below is information about this week's road closures:

Piasa Valley Area: 6th Street east of Alby Street is closed to Alton Street, with future work heading east to George Street. Alby Street is closed from 7th Street south toward 6th Street. 5th Street is closed east of Easton Street east to Court Street, with Court Street closed to George Street. Turner Tract Area: The intersection of Lincoln Street and Logan Street is closed, with Lincoln Street closed south to the alley south of McKinley Blvd. Pavement restoration should be completed west of Lincoln Street on McKinley

Blvd this coming week. The west end of the alley west of Lincoln Street, between McPherson and Douglas Streets, is closed to traffic. Road Closures Shields Valley Area: Chamberlin Street is closed north of Walker Street to Greenwood Street. The west end of Greenwood Street is closed.

The intersection of Walker/Chamberlin Streets will continue to be closed. Background: Over six miles of sanitary sewer main is being installed in the Turner Tract, Shields Valley, and Piasa Valley areas of Alton. Work kicked off in February 2021 and will continue to progress until 2023.

When Illinois American Water acquired the Alton Regional Wastewater system the company made a commitment to address requirements set forth by the Illinois Environmental Protection Agency to remedy combined sewer overflows.

The projects in Turner Tract and Shields Valley will address 1.69 miles of sanitary sewer main. These projects will continue into early 2022, depending on the location. The project area will change based on the progress of work. Signs will be placed ahead of construction work to notify customers of upcoming closures. The work in Piasa Valley began this spring.

This project includes almost five miles of sanitary sewer main. Work is expected to continue for over two years.

This does not mean work will occur in one area for 24 months, but rather, projects will continue to progress throughout neighborhoods during that time period. Signs will be placed ahead of construction to notify customers of upcoming closures. Safety: These closures are necessary for investments in the wastewater system to be completed in a safe manner. At Illinois American Water our team and our contractors work as quickly as possible to minimize inconvenience to our customers. We do our best to minimize the length of construction, but our #1 priority is safety. At times, road and sidewalk closures may be extended to support our commitment to safety. Contact: Customers should call 800-422-2782 with questions.
