

Illinois American Water Encourages Customers to Participate in National Prescription Drug Take Back Day on April 30, 2022

April 28 2022 8:56 AM

BELLEVILLE - – Illinois American Water is encouraging customers to participate in the Drug Enforcement Agency's (DEA) National Prescription Drug Take Back Day this

coming Saturday, April 30, 2022. Customers are encouraged to drop off unwanted medications at approved collection sites so they can be incinerated. The Environmental Protection Agency (EPA) recommends having unwanted medications incinerated. Flushing medications down the toilet and throwing them in the trash are discouraged.

The event is Saturday, April 30, 2022, from 10 AM to 2 PM. Participating Illinois Take Back Day collection sites can be located [here](#). Take Back Day events help keep medications from getting into the wrong hands and provide an opportunity for medication to be disposed of in an environmentally-friendly way. Proper disposal also helps prevent medications from being flushed down the toilet or poured down a drain.

Rachel Bretz, director of water quality and environmental compliance for Illinois American Water, explains, “We are encouraging residents to take advantage of the drug take back events in their area. These events are not only a safer alternative to dispose of unwanted medications, but they also help to protect our environment and waterways.”

Illinois residents who are unable to participate Saturday are encouraged to use local, permanent community pharmaceutical disposal programs. Through partnership and collaboration with local pharmacies, environmental stewards, police departments and government officials, Illinois American Water has helped implement permanent pharmaceutical disposal programs across the state. These programs and others can be found on Illinois EPA’s Beyond the Bin map [here](#). The map is searchable by location.

The pharmaceutical disposal programs were created through a model developed by Pontiac Township High School students and their teacher Paul Ritter. The program, P2D2, has been recognized as a model for all pharmaceutical disposal programs. Through P2D2’s efforts, millions of pounds of unwanted medications have been collected and disposed of properly.
