ALTON - Let the [Riverbender Tech Center](https://www.riverbender.com) help your business run more efficiently. Their technicians can remove viruses from your business computers, back-up data, and help you upgrade your current computer with more memory. They can even upgrade your computer with a new Solid State drive!

But, if you are in the market for a *new* computer, they also sell refurbished laptops – all with Solid State drives and either Windows 10 or 11. They will transfer the data from your old computer to one you purchase from our shop at no charge, and you even get a warranty!

Local small businesses move to the front of the line for repairs. This means you will have your computer back to you right away.

Before going to a big box store, give the Riverbender Tech Center a try. You will not be disappointed!

The Riverbender Tech Center is located at 312 Belle Street across the street from Mac's Timeout in Downtown Alton. Reach them by phone at [\(618\) 433-8989](tel:6184338989) or visit their website at RBTechCenter.com.
