

Illinois EPA Announces Grant Opportunity To Fund Energy Efficiency Assessments In Areas Of Environmental Justice Concern

March 4 2024 9:15 AM

SPRINGFIELD — Illinois Environmental Protection Agency (EPA) Director John J. Kim today announced the Energy Efficiency Assessment Grant Program, with up to \$500,000 in total funding available to public housing authorities, units of local governments (municipalities, counties, or townships) or nonprofit organizations for energy efficiency assessments at single family or duplex properties. The Energy

Efficiency Assessment Program will focus on properties serving residents receiving housing assistance and located in areas of environmental justice concern. A Notice of Funding Opportunity (NOFO) has been posted to the [Illinois EPA website](#).

Energy efficiency assessments are an effective benchmarking tool to reduce utility bills, improve building performance, and create climate resiliency in communities. Under this program, a professional energy assessor or auditor will evaluate a residence to find where energy usage is operating inefficiently and identify opportunities for energy savings. Eligible entities can then apply to the Illinois EPA's Energy Efficiency Trust Fund Grant Program to pay for the recommended upgrades and technologies to reduce energy consumption.

“Illinois EPA continues to prioritize funding opportunities for communities that have been disproportionately impacted by pollution and underinvestment,” said Director Kim. “Recipients of these energy efficiency assessments will be able to improve their usage practices and strategically invest in upgrades that lower utility bills.”

Applications for the Energy Efficiency Assessment Grant Program NOFO will be accepted until funds are expended and eligible properties will receive funding on a first come, first serve basis. Awards will range in size from \$5,000 to \$25,000. For eligibility and application information, visit: <https://epa.illinois.gov/topics/energy/energy-efficiency/energy-efficiency-assessment-program.html>. Before applying to the grant program, applicants must be pre-qualified through the Grant Accountability and Transparency Act (GATA) Grantee Portal, <https://gata.illinois.gov/>.

The Illinois EPA Office of Energy seeks to achieve energy equality and climate resilience by investing U.S. Department of Energy State Energy Program funds in projects across Illinois.
