SILENT  
AUCTION

Please join us for Dinner, Live Music & a Silent Auction. All proceeds will go to the Hallock family for assistance in getting LilyGrace and her parents to the NIH (National Institute for Health) in Bethesda MD. Fibrous Dysplasia (FD) is a very rare disease that causes tumors to grow in your bones replacing the bone matter. Drs at the NIH say LilyGrace (8yro) has an even more unusual occurrence than what is typically seen in children. She already has a tumor in her tibia and one in her femur both in the right leg. She also has FD in her spine but they need her at the NIH to explore it further. Then they'll set up a treatment plan for local doctors to follow. This is just a brief description of her condition. Isaac & Lynette Hallock are her parents. LilyGrace has a sister, Abbi (15yro) and a brother, Eli (10yro). Isaac lost his job almost 2 years ago and currently has employment thru a temp agency. They are still struggling to make ends meet.

THANK YOU for supporting #TEAMLILYGRACE. We look forward to seeing you on July 31st.

Look us up on Facebook by searching #TEAMLILYGRACE. Select the group with that name then ask to join and continue following LilyGrace's story. Event updates can be found there along with a link for purchasing t-shirts and FD Awareness Ribbon decals. Or copy/paste this link into your search bar: <https://www.facebook.com/groups/130119197393886/>
