

I LOVE TO TURN THE SWITCH AND HAVE MY LIGHTS, JUST LIKE ANYBODY ELSE.

BUT AT WHAT COST?

MEGA (METRO EAST GREEN ALLIANCE), THE PIASA PALISADES GROUP OF THE ILLINOIS CHAPTER OF THE SIERRA CLUB, AND WORKING FILMS PRESENT

COAL ASH STORIES

Coal ash is the waste material left after coal is burned. It contains arsenic, mercury, lead, and over a dozen other heavy metals, many of them toxic. Without proper management, these contaminants can pollute waterways, groundwater, drinking water, and the air. Join us on Tuesday, June 30th as we screen four short films that expose public health concerns, related policy, and community responses to this environmental injustice. Come learn about the issues, talk with one of the filmmakers, and find out how you can get involved.

ALTON

JUNE 27TH @ 6:30PM

Riverbender Community Center

200 W 3rd Street

Alton, IL

Co-hosted by: MEGA (Metro East Green Alliance)
