So, you've read some books on magick, and you're excited to begin, but how does this all fit together? What is important to consider, and what is optional? What are the principles and the structures involved when it comes to creating a ritual? What do you look for when you're looking at rituals of others to see what is going on energetically behind the scenes? In this two hour class, we will look at key points to consider when creating your own ritual, as well as what is important, what is optional, and what thoughts are just plain crap.

The class has a \$25 cash investment, handouts will be provided, and there are no prerequisites. For more information about attending, contact us at 618-433-9913. Reservations are recommended.
